SHELTON STATE TO OFFER TELECOMMUNICATION DEVICE FOR THE DEAF

A Telecommunication Device for the Deaf (TDD 2730) system that has been installed at Shelton State Community College will enable deaf or hard of hearing people to call the college for information concerning classes and/or other scheduled college functions. The system will be operational from 8 a.m. -5 p.m., Monday through Friday. The TDD telephone number is 391-2232.

"More and more students with disabilities are entering colleges and universities. Those of us in higher education have a responsibility to make sure education is accessible to all people, regardless of disability. Our goal is to create a barrier-free environment for all of our students. This new TDD telephone number is simply a step in this direction," said Tom Umphrey, Shelton president.

SHELTON STATE TO HOST HIGH SCHOOL OPEN HOUSE

Shelton State Community College officials are hopeful that the new Tech Prep program scheduled to begin this year in the West Alabama high schools will translate into more interest in the college's technical programs.

Shelton's annual open house that is held each spring on the college's Fifteenth Street Campus offers high school students in the college's service area the opportunity to visit the various technical departments of the college. As part of the morning's activities, the students learn about the types of jobs, pay schedule, industry requirements, etc. and receive other pertinent information that is necessary in order for them to make decisions concerning college and their future.

"Our open house for high school students is always a special event for the college," said Tom Umphrey, president. "Nationally and statewide, there is a new emphasis on technical education, and we believe it's important for high school students in this area to be given the opportunity to learn what we have available at Shelton State Community College."

This year's open house is scheduled for Friday, March 27, from 9 a.m. -12 noon. Approximately 400 students are already scheduled to attend this year's open house which is open to any high school student.

LOCAL PRINTMAKER CURRENTLY EXHIBITING IN SHELTON STATE LIBRARY

Chuck Hall, a local printmaker who works in a variety of styles and types, including woodcuts and mixed media collages, is currently exhibiting in the junior college library on Shelton State's Skyland Boulevard Campus. The exhibit will continue through March 20 and is free and open to the public.

Hall received his bachelor of science degree in art education from the University of Alabama and has continued his graduate work at the university. He attended the Arrowmont School of Arts and Crafts and has served as apprentice blacksmith for Black Warrior Forge.

He is currently an instructor of art at Northport Junior High School. In addition, he has served as an instructor for the Summer Arts Workshop and was a volunteer artist for Spectrefest and an arts and crafts judge for CityFest.

His exhibits include the Kentuck Festival; the 508 Gallery, New Orleans; Art Attack Gallery, New Orleans; Muses Show, Livingston; Business and the Arts Show; and a One Man Show, Junior League Art Gallery.

The exhibit will be open to the public during regular library hours:
Monday-Thursday, 8 a.m.-9 p.m. and Friday, 8 a.m. to 4 p.m.

INSTRUCTOR AT SHELTON SELECTED FOR NATIONAL SCIENCE FOUNDATION SUPPORTED WORKSHOP

Shelton State instructor Chuen Chuen Fang has been selected for the National Science Foundation supported workshop on "Developing Research-Based Community College Physics Curriculum." This workshop will be based on recent research and developments in physics education. One important aspect of this workshop, which is scheduled to be held March 26-28 at Lee College in Baytown, Texas, will focus on the effective use of active learning in college-level physics classes.

This workshop is part of a pilot two-year college physics curriculum development program sponsored by Joliet Junior College in Illinois, Lee College, and the National Science Foundation. This workshop will bring together two-year educators form all over the country who will be working on material that will help two-year college students develop a stronger understanding of physics.

Workshop leaders are professors David Maloney of Indiana University-Purdue University at Fort Wayne and Alan Van Heuvelen of New Mexico State University, well known physics educators who have won national recognition in the development and application of cognitive education research.

Updating science education programs at two-year colleges is important for the nation and for science because of the large number of students (particularly women and minorities) who attend two-year colleges and who need to be exposed to, and gain experience with, current technology and who need effective and efficient physics educational programs.

NEW JOBLINE INSTITUTED AT SHELTON STATE

Shelton State Community College announces a new JOBLINE number that will provide the community with a comprehensive employment service.

Businesses who are looking for new employees may call the JOBLINE number, 391-2414, or if they prefer, they may send the information through the facsimiling number, 391-2459. The college will publish the information requests on the campus telecommunications student information system, the college bulletin boards, and through Shelton's counseling centers.

WELLNESS CENTER OFFERING NEW CLASS AT SHELTON STATE

A ten week course, which began March 18 at the wellness center, is being taught to overeaters and people who have underlying stress problems. This is a non-credit course. The class will not only educate individuals in proper eating techniques but it will help the individual cope with the underlying stress in their lives . This class will incorporate both educational and behavioral modification techniques to help overeaters control the urge to overeat. The cost of this class is $50.00.
